

Roll No

AU-8003(3) (CBGS)
B.E. VIII Semester Examination, June 2020
Choice Based Grading System (CBGS)
Reliability Maintenance
Time : Three Hours

Maximum Marks : 70

Note: i) Answer any five questions.
ii) All questions carry equal marks.

1. Explain various probability distributions used in maintenance engineering explain them with examples.
2. Discuss followings :
 - i) Failure Rate
 - ii) Hazard rate
 - iii) Failure mode and MTTR
3. What is Markov analysis? How reliability and quality are related? Define unreliability.
4. Explain m component parallel systems and combined system; stand by systems; K-out-of-m systems with examples.
5. Write down the concepts of Breakdown, emergency, corrective, predictive and preventive maintenance.
6. What is maintenance prevention; design-out maintenance, productive maintenance, shutdown maintenance and scheduled maintenance? Explain with examples.
7. Define CBM? Discuss various condition monitoring techniques.
8. Write short notes on following.
 - a) Reliability Centered maintenance
 - b) Total Productive Maintenance
 - c) Failure Modes and Effects Analysis (FMEA)
 - d) Performance monitoring techniques
