

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

AU-8004 (2) (CBGS)
B.E. VIII Semester Examination, June 2020
Choice Based Grading System (CBGS)
Fault Diagnosis and Trouble Shooting
Time : Three Hours

Maximum Marks : 70

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.

1. a) Explain about the various mechanical diagnostic techniques. 7
b) What is the Oscilloscope? List three advantages of using an oscilloscope for testing signals. 7
2. a) What is sensor? Explain about the followings: 7
i) Anti-lock braking (ABS) speed sensor
ii) Coolant temperature sensor
b) Explain about the On and Off board diagnostics. 7
3. a) Describe how the colour of smoke from a diesel engine can be used as an aid to fault diagnosis. 7
b) Explain about the symptom, possible causes of faults, and suggested action related to engine fault diagnosis. 7
4. a) Describe the method of testing of brakes and explain the test equipments also. 7
b) Explain about the different types of tyre faults and state for each a possible cause. 7
5. a) Explain about the diagnosis of lighting system faults. 7
b) What are the main components of basic air bag system? Describe about the diagnostics of air bags and belt tensioner. 7
6. a) Describe how a scanner is connected to a vehicle and what information it can provide. 7
b) Explain about the followings: 7
i) Four wheel alignment
ii) Solenoid actuator
7. a) Explain about the various electrical diagnostic techniques. 7
b) Describe about the six-stage diagnostics process. 7
8. Write short notes on the followings. 14
a) Multimeter
b) Gas analyser
c) Knock sensor
d) Stepper motor
