

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

CE-3004-CBGS

B.E. III Semester

Examination, December 2020

Choice Based Grading System (CBGS) Advance Surveying and Remote Sensing

Time : Three Hours

Maximum Marks : 70

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.
iii) Draw neat diagram.

1. a) Explain Geodetic Surveying. What factors are to be considered while selecting a best triangulation figure or system? 7
b) Write down the principle of Plans table surveying and also explain instruments used in plain table surveying. 7
2. a) How to use planimeter in surveying? Write down components of planimeter. 7
b) What are different types of error in GPS observations and explain any one of them. 7
3. a) Explain base line measurement and also define corrections which is used in it? 7
b) Define 7
 - i) Reconnaissance Survey
 - ii) Triangulation principle

CE-3004-CBGS

PTO

[2]

4. a) Explain elements of satellite based survey map datum's. 7
b) Write down the components of GPS and explain. 7
5. a) Explain remote sensing data acquisition process. 7
b) Define Indian Remote Sensing Satellites and their application. 7
6. a) Elevations of two triangulation stations A and B, 106 km apart are 131m and 434 in respectively. A peak C 80 km from station A has an elevation of 221 –50 m. As certain it A is visible from B not. Also find the minimum height of scaffolding at B, so that the line of sight has a minimum 3 m clearance anywhere. 7
b) Explain the importance of surveying in civil engineering. 7
7. a) What is GIS? And explain its components. 7
b) What are the various methods of determining scale of vertical photograph? 7
8. Write short notes on: 14
 - i) Tilted photograph and oblique photographs
 - ii) Residual error
 - iii) Active remote sensing
 - iv) Station marks
