

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

CE-403 (GS)
B.E. IV Semester Examination, June 2020
Grading System (GS)
Surveying
Time : Three Hours

Maximum Marks : 70

Note : i) Attempt any five questions.
ii) All questions carry equal marks.

1. a) Describe the use of tacheometry for traversing and contouring.
b) State the importance of substance bar draw neat sketch of it.
2. Mention the fundamental difference in Stadia method and Subtense method.
3. What is trigonometrical levelling? Also discuss its use in surveying.
4. Explain the basic principle of Electro - Magnetic distance meter with neat sketch.
5. For the following traverse, compute the length CD, so that A, D and E may be in one straight line.

Line	Length in meters	Bearing
AB	110	$83^{\circ}12'$
BC	165	$30^{\circ}42'$
CD	?	$346^{\circ}6'$
DE	212	$16^{\circ}18'$

6. Describe Sounding. What are the different equipments used in sounding?

OR

The approximate length of AC and BC were 8250.7 m and 10864.7 m. From the satellite 's' at a 63.19 m from the triangulation station 'C', the following direction were observed. $\angle A = 0^{\circ}0'0''$, $\angle B = 72^{\circ}55'32''$, $\angle C = 297^{\circ}13'02''$. Calculate the $\angle ACB$.

7. What do you understand by Remote Sensing? Discuss its applications.

OR

Describe the five elements of simple circular curve. Derive their expressions.

8. Define the following terms :(any two)

- i) Bubble down
- ii) Transiting
- iii) Centering
- iv) Balancing of survey
