

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

CE-6005(1)-CBGS

B.E. VI Semester

Examination, June 2020

Choice Based Grading System (CBGS)

Advanced Water Resources Engineering

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. What do you understand by Frequency analysis and Risk analysis? Explain.
2. What is optimal rain gauge network design? Explain clearly.
3. a) What is meant by Flood routing through reservoirs?
b) Explain channel routing Muskingum method.
4. How optimization techniques useful in water resource management system? Explain clearly.
5. Define: Rule curves, linear decision rule and linear programming.
6. What do you understand by dynamic programming? How it can be used in optimal operating at water resource system?
7. What do you understand by Project optimality analysis? Explain.

PTO

[2]

8. Briefly describe any four of the following.
- a) Depth-area duration analysis
 - b) Stochastic models
 - c) Simplex method
 - d) Network methods
 - e) Optimal operating policies
