

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

CE-8002 (CBGS)
B.E. VIII Semester Examination, June 2020
Choice Based Grading System (CBGS)
Geo-Technical Engineering - II
Time : Three Hours

Maximum Marks : 70

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.
iii) Assume missing data suitably, if required.

- | | | |
|-------|---|---|
| 1. a) | Explain different types of shallow foundations in detail with neat sketch. | 7 |
| b) | Explain clearly about plate load test with neat sketch. | 7 |
| 2. a) | Write brief notes on: | |
| i) | Negative skin friction | 3 |
| ii) | Under-Reamed pile foundation | 4 |
| b) | Write brief notes on: | |
| i) | Tilts and Shifts in well foundations. | 3 |
| ii) | Draw typical section of well foundation showing names of various parts. | 4 |
| 3. a) | Define compaction, factors affecting compaction and what do you mean by bitumen soil stabilization? | 7 |
| b) | Explain in brief about proctor compaction test for finding out OMC and MDD in laboratory. | 7 |
| 4. | Clearly explain the following soil stabilization methods. | |
| a) | Mechanical soil stabilization | 4 |
| b) | Chemical soil stabilization | 3 |
| c) | Thermal soil stabilization | 4 |
| d) | Cement soil stabilization | 3 |
| 5. a) | Explain various methods of soil Exploration. | 7 |
| b) | Explain construction techniques on expansive soils and collapsible soils. | 7 |
| 6. a) | Discuss clearly about CNS technique layers with help of neat sketch. | 7 |
| b) | What are the various factors affecting bearing capacity soil? and explain them clearly. | 7 |
| 7. | Write short notes on: | |
| a) | Coffer dams | 4 |
| b) | Mass spring analogy | 3 |
| c) | Vibration isolation | 4 |
| d) | Skempton soil bearing capacity | 3 |
| 8. a) | Explain the classification of sheet piles and discuss them clearly with neat sketch. | 7 |
| b) | Explain about Design of block foundation for impact type machine. | 7 |
