

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

CE-8043 (GS)
B.E. VIII Semester Examination, June 2020
Grading System (GS)
Air Quality Monitoring and Control
(Elective - II)
Time : Three Hours

Maximum Marks : 70

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.

1. What do you understand by Ozone holes? What are the effects of it? Also explain the control of Ozone depletion.

OR

Which do you think is a greater danger to man, pesticides used by farmers and householders or toxic substances discharged into the air and water by industrial plants? Explain.

2. Explain the importance of genetic & climatic factors in relation to the effects of air pollution on plants.
3. Determine the effective height of a stack, with the following given data:
- i) Physical stack is 180m tall with 0.95m inside diameter.
 - ii) Wind velocity is 2.75 m/sec
 - iii) Air temperature is 20°C
 - iv) Barometric pressure is 1000 millibars
 - v) Stack gas velocity is 11.12 m/sec
 - vi) Stack gas temperature is 160°C

4. Write short notes on
- a) Status of air pollution control in various countries
 - b) Air pollution control by site selection and zoning.

OR

What is meant by Occupational disease? Explain by giving an example. Also mention its control techniques.

5. a) Discuss the meaning of "PHOTOSMOG".
b) Describe the general diseases caused by air pollutants.
6. What are the instruments used for sampling gases and vapours? Explain any one with a neat sketch.

[2]

7. What are the principal gases of concern in air pollution control? What are the four types of treatment processes available for control of gases? Explain each in short.
8. Answer any three of the following:
- a) What are different effects of air pollution on human beings.
 - b) Explain -
 - i) PAN
 - ii) PBN
 - iii) PNN.
 - c) What are the factors governing selection of air monitoring stations?
 - d) Enlist different occupational diseases and their source.
 - e) Explain industrial ventilation.
