CS-5005(1)-CBGS

B.E. V Semester

Examination, June 2020

Choice Based Grading System (CBGS) **Object Oriented Analysis and Design**

Time : Three Hours

Maximum Marks : 70

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.

1. a) What is an Abstract class? What is a Concrete class?
Explain with example abstract class and abstract operation. 7
b) Define the term object oriented. Explain the various aspects included in object oriented approach. 7
2. a) How does the object oriented approach differ from the traditional approach? Why is re-usability important? How does Object-Oriented Software Development Promote (achieve) and improve reusability? 7
b) Explain the Object Modelling Technique with suitable example. 7
3. a) Explain the state diagram with a suitable example. Also define its components and use. 7
b) Compare object oriented programming language C++ and JAVA. 7
4. a) Explain the OO system design life cycle model. 7
b) What kinds of errors do you make if you directly rush into the implementation phase of a software project? How do you decide which classes, associations and generalizations should be eliminated? 7

CS-5005(1)-CBGS

PTO

[2]

5. a) Explain characteristics of object-oriented programming. 7
b) Define addressing modes. Give the details of different addressing modes. 7
6. Under what situation activity diagram should not be used? Which diagrams are preferable under such situations? Also give practical situations, when to use the following diagram: 14
 - a) Use-case diagram
 - b) Object diagram
 - c) Interaction diagram
7. What are the similarities/dissimilarities between a sequence diagram and collaboration diagram? Draw the interaction diagram for an ATM-used for card based banking system. 14
8. a) Illustrate the comparison of use-case driven approach. 7
b) Why interaction model is more important for application analysis? Briefly explain the steps for preparing 'application interaction model'. 7
