B.E. VII Semester

Examination, December 2020

Choice Based Grading System (CBGS)

Modern Information Retrieval

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) Explain the issues in the process of Information Retrieval.
b) Discuss the components of Information Retrieval system in detail.
2. a) Write a short note on Standard Boolean approach with its key advantages and disadvantages.
b) Explain how coordination, Proximity, field level and stemming affect the broadness or narrowness of a query.
3. a) How do you expect that relevance feedback using negative judgement will affect the precision and recall?
b) Explain the concept of inverted index file. How it can be used in Information Retrieval?
4. a) Explain the crawler indexer architecture.
b) Compare HITS and Page rank algorithm in detail.

PTO

[2]

5. a) What are the five stages in document preprocessing? Explain.
b) Explain how clustering can be used for query expansion, document grouping, document indexing and visualization of search result.
6. a) Explain how web crawlers can be used for general web search, vertical web search, web archival, web characterization, web mirroring and website analysis.
b) What do you mean by Meta Search?
7. a) What is the use of ranking algorithm?
b) What are the various measures to evaluate the performance of search engines? Explain them in brief.
8. Write short notes on any two of the followings:
 - i) Online IR system
 - ii) Web Personalization
 - iii) Digital Library searches
