

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

CS-7103-GS
B.E. VII Semester
Examination, December 2020
Grading System (GS)
Embedded Computer System
Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) What are Embedded systems? Compare with general computing systems.
b) Explain the quality attributes of embedded system.
2. a) Explain the embedded programming in C.
b) What is embedded formula? What is the role of PCB and passive components in embedded system?
3. a) Explain various addressing modes supported by 8051 microcontroller. Give example.
b) What are the fundamental issues in Hardware software co-design?
4. a) Describe PCB layout design and its fabrication?
b) What are different approaches used in embedded firmware design.

CS-7103-GS

PTO

[2]

5.
 - a) What approaches do we follow while designing embedded firmware design.
 - b) Explain the process of converting a C program into the file for ROM image.
6.
 - a) Write short notes on simulators and emulators.
 - b) What is EDLC? Explain different phases of EDLC.
7. Explain the functions of an editor interpreter, compiler, assembler and cross compiler for an embedded system design.
8. Explain the following term
 - a) Iterative model
 - b) Embedded OS trends
