

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

CS-7104 (GS)

B.E. VII Semester Examination, June 2020

Grading System (GS)

Real Time Fault Tolerant Systems

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) Discuss about stochastic petri nets and stochastic activity network.
b) Describe fault injection based application.
2. How many classes of fault injectors are used in NFTAPE? Explain briefly.
3. Describe the following terms:
 - i) Fault detection and redundancy
 - ii) Heart beats
 - iii) Damage confinement
4. Discuss briefly about partially self checking circuits.
5. a) What are the error Models explain?
b) Explain error control coding in detail.
6. Define reliable communication and agreement protocols in detail.
7. a) Classify the Hardware faults.
b) Explain failure rate and Bath tub curve.

OR

What is database commit protocol explain in detail?

8. Explain the following terms in detail
 - a) IRIX checkpoints
 - b) Ultra SAN
 - c) Watch dog processors
