

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

CS-8301 (GS)
B.E. VIII Semester Examination, June 2020
Grading System (GS)
Bioinformatics
(Elective - III)
Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.
ii) All questions carry equal marks.

1. Write a program that takes as input a DNA sequence and outputs the length of sequence.
2. How Data Cleaning is done? Explain its transformations.
3. a) How mining the gene expression data?
b) What are the significance of Data cleaning and transformation?
4. a) What is bioinformatics? Gives its objectives and application of bioinformatics.
b) Write the difference between molecular approach and bioinformatics approach?
5. Explain following methods of computational sequence alignment:
i) Dot Matrix Analysis
ii) Word-based Method
6. Write a short notes on any three of the following:
a) E-cell
b) Genetic Networks
c) Nucleotide sequence databases
d) Biological decoder ring
7. a) What do you understand by Genetic Methods? Write its uses.
b) Draw flow charts for protein structure prediction.
8. Explain the following:(Any two)
a) CORBA
b) Cloning Methodology
c) Dynamic Programming.
