

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

EC-5003-CBGS

B.E. V Semester

Examination, December 2020

Choice Based Grading System (CBGS)

Microprocessor and Microcontroller

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) Explain the architecture of 8086 microprocessor and also explain which factor help the speed up operation of 8086 microprocessor.
b) Explain the minimum mode configuration of 8086 microprocessor.
2. Explain the segmentation of memory and write the advantages of segmentation of memory.
3. a) What do you mean by addressing modes? What are the different addressing modes supported by 8086? Explain each of them with suitable examples.
b) What are the different instruction types of 8086? Explain them with suitable examples.
4. a) Write a program in assembly language to add the contents of memory location 2000H: 0500H to contents of 3000H: 0600H and store the result in 5000H: 0700H.
b) Explain the functions of Assembler and Linker.

EC-5003-CBGS

PTO

[2]

5.
 - a) Explain the architecture and working of 8255.
 - b) Explain about programmable communication interface 8251 USART.
6.
 - a) Explain different types of 8086 interrupts.
 - b) Explain the basic operation of DMA controller 8257.
7.
 - a) Explain the memory organization of 8051.
 - b) Write ALP to find average of two numbers in 8051.
8. Write short notes on any two of the following.
 - a) 8051 pin diagram
 - b) Data transfer instruction set of 8051
 - c) Features of 8051
