

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

EC-5003-CBGS

B.E. V Semester

Examination, June 2020

Choice Based Grading System (CBGS)

Microprocessor and Microcontroller

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) Explain the segmentation of memory and write the advantages of segmentation of memory.
b) Explain the addressing modes of 8086 microprocessor with examples.
2. a) Explain interrupt vector table of 8086 microprocessor.
b) Interface programmable interrupt controller 8259 in case code mode with 8086 microprocessor.
3. Discuss in detail about the ALP tools.
4. With the help of block diagram explain the architecture, features, memory organisation and addressing modes of 8051.
5. a) Explain the architecture of HDP 8087.
b) What is multiprocessor system. Explain tightly coupled system with diagram.

EC-5003-CBGS

PTO

[2]

6. Explain the architecture of 16-bit processor 8086 with the help of block diagram indicating each component. How does it fetch an instruction from memory in Maximum/Minimum mode?
7. Explain the architecture of the 8259 interrupt controller with neat diagram.

OR

Explain the need for Interrupt? Define ISR. Explain the steps involved in executing the interrupt.

8. a) Explain the modes of DMA transfer.
b) Explain with neat diagram the operation of 8257.

EC-5003-CBGS
