

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

EC-504 (GS)
B.E. V Semester Examination, June 2020
Grading System (GS)
Microprocessors and Microcontrollers
Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.
ii) All questions carry equal marks.

1. In a state with the flow chart initialization of the 8259 PIC, what are the maximum and minimum requirements of the (ICW's).
2. Discuss how to determine the control word of 8255. Make the control word for following port setting in mode 'O': Port A as an input port, Port B as an output port, Port C upper as a input port, port c lower as an input port.
3. Explain in brief:
 - i) Editor
 - ii) Linker
 - iii) Locator
4. Explain the following 8086 instructions:
 - i) MOV mem/reg, data
 - ii) XCHG reg
 - iii) PUSH mem/reg
 - iv) ADD mem/reg, data
5. a) Differentiate maximum and minimum mode of 8086 microprocessor with the help of timing diagram.
b) Explain the following:
 - i) Memory segmentation
 - ii) Bus buffering and latching
6. Explain interrupt structure of the 8051 microcontroller. Explain two level interrupt priority. If two requests of interrupts are received simultaneously, how are these handled by the 8051.
7. What is the function of flag register? Describe in detail the flag register of the microprocessor 8086.

OR

Explain EIU and BIU in detail.

8. Write short notes on any three of the following:
 - a) Instruction set of 8051
 - b) Programmable Internal Timer 8253
 - c) Applications of 8051 microcontroller
 - d) Various flags of 8086
 - e) ALP Tools
