

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

EC-7004(1)-CBGS

B.E. VII Semester

Examination, December 2020

Choice Based Grading System (CBGS)

Data Communication

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) Explain ISO/OSI reference model.
b) What is switching? Explain circuit switching packet switching and message switching.
2. a) Explain ISDN.
b) Describe Modem with neat diagram.
3. a) Explain stop and wait protocol.
b) Explain CSMA/CD protocol (MAC).
4. a) Differentiate between virtual circuit and datagram subnet. Give two example application for which connection oriented service is appropriate.
b) Describe the two main task for traffic management in ATM based networks.
5. a) What is the difference between a Datagram and Virtual circuit operation?
b) Explain the purpose and function of the ATM Adaptation Layer type 5 (AAL5) protocol.

[2]

6.
 - a) By considering the operation of the TCP protocol, explain how it is able to overcome errors in the transmission and ensure that data is transferred reliably over a network.
 - b) Compare and contrast the IPv4 and the IPv6 header fields. Do they have any fields in common?
7.
 - a) Describe the major components of the SNMP management model.
 - b) Explain the following encryption methods:
 - i) Substitution cipher
 - ii) Transposition cipher
8. Write short notes on any two:
 - i) ATM Model
 - ii) ALOHA
 - iii) TSAP
