

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

EC-703(B)-CBGS

B.Tech., VII Semester

Examination, December 2020

Choice Based Grading System (CBGS)

Internet of Things (IoT)

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) Explain the various emerging IoT applications.
b) Explain various trend in Information and communication technologies and its impact on IoT.
2. a) Describe how a solution is designed for a particular problem by making use applied architecture in M2M/IoT. Also, explain the use of partitioning the architectural work and solution work into two domains.
b) Explain how cloud of things acts as an enabler for new value added services and applications with a neat diagram.
3. a) Illustrate ITU-IoT Reference model in detail with a neat diagram.
b) Explain OGC functional architecture and interactions with a neat diagram.
4. a) Explain service choreography and Processing of IoT services with a neat diagram.
b) Explain the deployment and operational view, resources, services, virtual entities, users in an IoT system by considering a Parking lot example.

EC-703(B)-CBGS

PTO

[2]

5. a) Discuss IETF Working Groups and Specifications Scope.
b) Discuss the design objectives of IoT architecture needed to target a horizontal system of real-world services.
6. a) Describe the information exchange patterns in IoT.
b) Summarize the Megatrends, Capabilities and implications of IoT.
7. a) Explain device and application functional group, communication functional group, IoT service functional group and virtual entity functional group in detail with a neat diagram of IoT functional view.
b) Differentiate between Industrial IoT and Automotive IoT.
8. a) Comment on the given topic:
i) SOAP
ii) REST
b) Enumerate the IoT privacy and control solutions.
