

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

EC-8003(2) (CBGS)
B.E. VIII Semester Examination, June 2020
Choice Based Grading System (CBGS)
Mobile Computing
Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.
ii) All questions carry equal marks.

1. a) How does frequency reuse increase spectrum efficiency in a cellular system? Which is the main problem caused due to frequency reuse in a cellular architecture?
b) What is Fading? What are different techniques used to minimize the effects of fading?
2. a) State the conditions when a hand-off is needed. Differentiate between hard handoff and soft handoff.
b) How are multiple access techniques classified? Distinguish between them.
3. a) Name the main elements of the GSM system architecture and describe their functions.
b) Differentiate between GSM and GPRS. Why is a new infrastructure needed for GPRS?
4. a) Explain the IEEE 802.11 WLAN protocol architecture.
b) What is HIPERLAN? Discuss the protocol architecture of HIPERLAN.
5. a) Write the advantages and disadvantages of Snooping TCP.
b) Discuss WAP architecture and compare this architecture with the typical internet architecture.
6. a) Define the entities in Mobile IP. Explain the mechanism used for forwarding packets in Mobile IP.
b) Explain the characteristics and applications of Wireless Sensor Networks.
7. a) Discuss the various approaches of intrusion detection systems.
b) What is a firewall? Discuss firewall design principles.
8. Write short notes on (any two):
 - a) Antenna Types
 - b) Ad hoc networks
 - c) Biometrics
