

Total No. of Questions :8]

[Total No. of Printed Pages : 1

Roll No

EC-8014 (GS)
B.E. VIII Semester Examination, June 2020
Grading System (GS)
Introduction to Microcontroller for
Embedded Systems
(Elective - II)
Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.
ii) All questions carry equal marks.

1. Discuss in detail how interrupts are handled in microcontroller system.
2. How hibernation module is used to place the device in a low power state on Tina? Also compare the active and standby mode current consumption.
3. a) Define Embedded system. Explain application areas of embedded system.
b) Differentiate bluetooth and wi-fi protocol.
4. Explain Memory and I/O interfacing concepts and memory mapped I/O.
5. Explain SPI protocol and UART protocol.

OR

Write a short note on timing generation and measurement. Explain real time clock.

6. Explain the working of I2C protocol. Write down its advantages and disadvantages.
7. Explain in brief with respect to embedded system.
 - i) DMA
 - ii) ADC
8. Write short notes on (Any Two):
 - a) Synchronous and Asynchronous interfaces
 - b) Wireless protocols and its applications
 - c) Zigbee
 - d) Active vs stand by current consumption
