

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

EC-803 (GS)
B.E. VIII Semester Examination, June 2020
Grading System (GS)
Computer Networks
Time : Three Hours
Maximum Marks :70

Note : i) Attempt any five questions.
ii) All questions carry equal marks.

1. Compare the basic characteristics of standard Ethernet, fast ethernet, Gigabit ethernet and 10 Gigabit ethernet.
2. a) Discuss the principle working of RFID.
b) Discuss the use of repeaters, hubs, bridges and routers in data link layer switching.
3. Explain Adaptive and Non-Adaptive Routing Algorithm.
4. What are the advantages of fiber optics over copper as a transmission medium? Is there any downside of using fiber optics over copper. A noiseless 4KHz channel is sampled every 1m sec. What is the maximum data rate? How does the maximum data rate change if the channel is noisy, with a signal-to-noise ratio of 30dB?
5. How does selective-repeat-ARQ protocol differ from Go-back-N ARQ? Discuss with suitable diagrams. Name the three types of HDLC frames and give a brief explanation of each.
6. Write short notes on :
 - a) HDLC
 - b) Collision free protocol
 - c) IPv6 protocol
7. What is a Switch? What is a Transparent switch? What do we mean when we say that a switch can filter traffic? Why is filtering important?

OR

Explain about virtual circuit and datagram Networks.
8. Answer any four of the following:
 - a) Explain various transmission modes.
 - b) Explain stop and wait sliding window protocol.
 - c) Explain hub, bridge and switches.
 - d) Explain TCP protocol.
 - e) What do you understand by WWW?
 - f) What is DNS?
