

Total No. of Questions : 8]

[Total No. of Printed Pages :2

Roll No

EE-7202-GS

B.E. VII Semester

Examination, December 2020

Grading System (GS)

Calibration and Testing of Electrical Equipments

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) As per IS explain the maintenance and testing of protective relays.
b) How can energy-meter be calibrated in laboratory?
2. a) Give systematic procedure for installation and commissioning of 33/11 kV outdoor substation.
b) What are the general safety requirements of the consumer's premises as mentioned in Indian Electricity Rules 1956?
3. a) Different Switchgear and earthing as I.S. specification.
b) As per I.S. Specification Describe Impulse testing Transformer.
4. a) How will you install power transformer? What are the various tests conducted during its installation and commissioning.
b) Give the general guidelines as per IS for installation and commissioning of motors below 1000 volts.

EE-7202-GS

PTO

[2]

5.
 - a) Explain, what is the purpose of earthing? Describe plate type earthing.
 - b) Illustrate the general guidelines as per IS for installation and commissioning of outdoor transformers.
6.
 - a) Explain penalty for interference with meters or licensee works and for improper use of energy.
 - b) What is IS:3156? Describe the various tests explained under this code.
7.
 - a) What are the various tests conducted on transformer oil? Write in detail break down voltage test on transformer oil.
 - b) Explain with circuit diagram the test on single pole circuit breakers below 240V of voltage rating.
8. Write short note on any two of the following:
 - a) List the various calibration characteristics
 - b) Calibration of relays
 - c) Installation of CT and PT
