

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

EX-6004-CBGS

B.E. VI Semester

Examination, June 2020

Choice Based Grading System (CBGS)

Electronic Instrumentation

Time : Three Hours

Maximum Marks : 70

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.

1. a) Draw block diagram of CRO and write different parts with their functions.
b) With the help of suitable diagrams differentiate dual trace and dual beam CROs.
2. a) With the help of suitable example explain how inductance is measured with a A.C. Bridge.
b) Draw and explain Maxwell's inductance capacitance bridge.
3. a) What is permittivity? How to measure relative permittivity? Give suitable example.
b) What is Q meter? What are its applications? How measurement is done using Q meter?
4. a) Define transducer. Give a suitable classification of transducers and name one transducer from each class.
b) Explain the construction and working of LVDT. How it differs from RVDT?

EX-6004-CBGS

PTO

[2]

5.
 - a) Describe the different modes of operation of piezo electric transducers.
 - b) Differentiate photo voltaic, photo conductive, photo diode and photo optic transducers.
6.
 - a) Explain the term “harmonic distortion”. Describe the functioning of a total harmonic distortion meter.
 - b) What is wave analyzer? Differentiate frequency selective and heterodyne wave analyzer.
7.
 - a) What are the advantages of digital instruments over analog instruments? Give examples.
 - b) Explain the display systems like LED, LCD and CRT.
8. Write short notes on any two of the followings:
 - i) Digital pH meter
 - ii) Strain Gauge
 - iii) Sine wave generator
 - iv) De Sauty’s Bridge
