

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

EX-7001-CBGS

B.E. VII Semester

Examination, June 2020

Choice Based Grading System (CBGS)

Computer Network

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) What is Distributed System? Explain with the help of examples. 7
b) Describe the Circuit Switching. A file of 'x bits' is sent from host A to host B over a circuit switched network that uses TDM with 'h slots' and have a bit rate of 'R Mbps'. The circuit establish time is k seconds. Find the total time. 7
2. a) Explain the different layers of OSI reference model. 7
b) What is terminal handling? Where and why it is used? 7
3. a) A bit stream 1010101001 is received using the standard CRC method with generator polynomial x^3+1 . Is it without error? 7
b) Compare pure and slotted ALOHA. 7
4. a) Write short notes on: 7
i) RS232C
ii) X.25
b) What are gateways? Compare connection oriented and connectionless gateways. 7

EX-7001-CBGS

PTO

[2]

5. a) Briefly describe multipath or bifurcated routing. 7
b) Discuss CSMA/CD protocol. How it improve the performance over CSMA protocol for long frames? Explain. 7
6. a) Discuss ISDN system architecture in support of its goals and services. 7
b) What does the concept of virtual path and virtual channel mean in ATM networks? Give advantages and disadvantages of these. 7
7. a) Write down the functions of presentation and application layer. 7
b) Explain the components of Network management. Explain SNMP (Simple Network Management Protocol). 7
8. Write short notes on any two: 14
 - a) DES
 - b) Token Ring
 - c) TCP and UDP
 - d) Mobile Networking
