

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

EX-7102-GS

B.E. VII Semester

Examination, December 2020

Grading System (GS)

EHV AC and DC Transmission

Time : Three Hours

Maximum Marks : 70

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.

1. a) Explain the limitations and advantages of EHV AC transmission.
b) Discuss the modern trends in EHV AC and DC transmission.
2. a) Give the comparison of AC and DC transmission from the point of view of economics of transmission.
b) Describe the kinds of dc links with applications.
3. a) What are FACTS devices? How are they effective in handling the power in the time?
b) Draw the schematic diagram of UPFC and explain it.
4. Explain the following :
 - i) Multiterminal DC lines
 - ii) Commutation failure

EX-7102-GS

PTO

[2]

5. What is travelling wave? Explain the development of such a wave on overhead transmission line.
6.
 - a) Explain the concept of attenuation and distortion in travelling waves.
 - b) How lighting and switching surges are controlled in a power system?
7.
 - a) Distinguish AC load flow and DC load flow
 - b) Explain the mechanism of lightening stroke.
8. Write short notes (any two):
 - a) Ignition angle control
 - b) Adverse effects of harmonics in HVDC system
 - c) Thyristor Controlled Phase Shifting Transformer (TCPST)
