

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

EX-7102 (GS)
B.E. VII Semester Examination, June 2020
Grading System (GS)
EHV AC and DC Transmission
Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) Discuss the kinds of HVDC links. How it is differ from HVAC links?
b) Give the comparison of HVDC and HVAC transmission system.
2. a) Discuss the concept of attenuation and distortion in travelling waves.
b) Explain surge impedance of a line and the factors on which it depends.
3. a) What are FACTS devices? How are they effective in handling the powerful in the time?
b) Draw the schematic diagram of UPFC and explain it.
4. a) How lighting and switching surges are controlled in a power system?
b) Discuss the commutation failure.
5. a) Give the comparison of AC and DC transmission from the point of view of economics of transmission.
b) Describe the kinds of dc links with applications.
6. What are the ground return? Explain the problems associated with use of ground on return conductor.
7. Describe with proper diagram the concept of FACTS and its advantages.

OR

Explain the need of compensation in transmission system. Also explain STATCOM.

8. Write short notes (any two):

- a) Ignition angle control
- b) Thyristor Controlled Phase Shifting Transformer (TCPST)
- c) Distinguish AC load flow and DC load flow
