

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

EX-7201-GS

B.E. VII Semester

Examination, December 2020

Grading System (GS)

High Voltage Engineering

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) What is need for generating high voltages in laboratory?
b) Discuss the important applications of high voltage.
2. Compare all the salient features of both EHVAC and EHVDC transmission system which scheme is more suitable in Indian context.
3. a) Explain briefly various mechanisms of break down in solids.
b) Explain the process of break down in electronegative gas.
4. What are the tests on transformer and explain the impulse testing of transformer?
5. Explain the different scheme for cascade connection of transformer. How is it advantageous over cascade connected transformer?

EX-7201-GS

PTO

[2]

6. Discuss the different methods of measuring high DC voltages. What are the limitations in each method?
7. Explain the generating voltmeter used for measuring high dc voltages. How does it compare with a potential divider for measuring high dc voltages?
8.
 - a) Explain the partial discharge tests on high voltage cables? How is a fault in the insulation located in this test?
 - b) Explain high voltage tests on Transformer.
