

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

EX-7203 (GS)
B.E. VII Semester Examination, June 2020
Grading System (GS)
Computer Networks
Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.
ii) All questions carry equal marks.

1. Given a remainder of 111, a data unit of 10110011 and a divisor of 1001, is there an error in the data unit. Justify your answer with necessary principles.
2. What are two reasons for using layered protocols? What is one possible disadvantage of using layered protocols?
3. Compare the different types of switching techniques used in communication networks. Discuss their advantages and disadvantages with the help of timing diagram?
4. Distinguish between :
 - i) Static and dynamic routing
 - ii) Centralized and distributed routing
5. Explain with examples different types of guided and unguided medias in computer network?
6. What is network topology? Explain mesh, ring and star topologies bringing out their merits and demerits.
7. Explain packet and message switching with examples.

OR

Explain ISO OSI model with different layers.

8. Answer any two of the following:
 - a) Discuss design issue of second layer in OSI model.
 - b) Define goal and services of ISDN.
 - c) What are service element of application layer?
 - d) What are benefits of network monitoring tool?
