

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

EX-8003 (1) (CBGS)
B.E. VIII Semester Examination, June 2020
Choice Based Grading System (CBGS)
Objected Oriented Methodologies C and C++
Time : Three Hours

Maximum Marks : 70

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.

1. a) What do you mean by data types? How many data types does C language consist? 7
b) Explain integer and float conversion with example. 7
2. a) Write a program that shows concept of switch case. 7
b) How to initialize array? Explain with example and write its uses. 7
3. a) Explain with the help of a program how object oriented programming overcomes the shortcomings of procedure oriented programming. 7
b) Explain about call by reference and return by reference with program. 7
4. a) Explain break, continue and goto statement with example and their use. 7
b) Define C processor and write features of C processors. 7
5. a) Explain memory management function malloc(), calloc() and free(). 7
b) Explain the basic concepts of Object Oriented Programming. 7
6. a) Explain briefly about function overloading with a suitable example. 7
b) Explain the copy constructors with an example. 7
7. a) Explain the different types of polymorphism. 7
b) Describe Pure Virtual function with an example. 7
8. a) Explain the role of seekg(), seekp(), tellg(), tellp(), function in the process of random access in a binary file. 7
b) Explain in detail about exception handling in C++ with suitable code. 7
