

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

EX-8402 (GS)
B.E. VIII Semester Examination, June 2020
Grading System (GS)
Cellular Mobile Communication
(Elective - IV)
Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.
ii) All questions carry equal marks.

1. a) Find the transfer function of the propagation channel of Mobile-to mobile Propagation.
b) What are different types of cell site and mobile antenna? Explain in detail.
2. a) Describe diversity receivers.
b) Describe the process of cell splitting and sectorization.
3. Explain the underlay-overlay arrangement.
4. a) Explain propagation of signal over water or flat area.
b) Explain near-end-far-end interference.
5. Explain designing a system to serve a predefined area that experiences cochannel interference.
6. a) Explain point-to-point model with equations.
b) How will you increase the cell coverage for noise limited system?
7. What are the different methods of synthesis of sum and difference patterns of antennas? Explain in detail.
8. Write short notes on any two of the following:
 - a) PCS
 - b) Foliage loss
 - c) CDMA system
