

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

FT-6004-CBGS

B.E. VI Semester

Examination, June 2020

Choice Based Grading System (CBGS)

Electrical Fire Safety

Time : Three Hours

Maximum Marks : 70

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.

1. a) What is difference between accuracy and precision of a measuring instrument. 7
b) What is Piezo Electric Transducer? Explain its working with the help of circuit diagram. 7
2. a) Define LVDT and explain its working. 7
b) Mention the factors which Influence the choice of a transducer. Also provide different classifications of transducers. 7
3. a) Explain digital instruments with the help of block diagram. Also mention different advantages of digital instrument over analog instruments. 7
b) Explain R-2R ladder type DAC. 7
4. a) Discuss ramp technique of analog to digital conversion. 7
b) With the help of diagram explain electronic spot type heat detectors. 7

FT-6004-CBGS

PTO

[2]

5. a) Mention different criteria for selection of detector.
Explain Radiant energy sensing Fire Detector. 7
b) Explain photo electric smoke detector along with its
working. 7
6. a) Define earthing. Explain different methods and its
applications. 7
b) Define circuit breaker. Explain working and importance
of any one circuit breaker. 7
7. a) Explain how the human body is adversely affected by
electrical current. 7
b) Mention different steps to be taken for prevention from
electrical fire. 7
8. Write short notes on any two: 14
 - a) Loading effect
 - b) Strain gauge
 - c) Air sampling type smoke detector
 - d) AC shocks versus DC shock.
