

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

FT-804 (GS)
B.E. VIII Semester Examination, June 2020
Grading System (GS)
Industrial Hygiene and Occupational Health
Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.
ii) All questions carry equal marks.

1. Calculate daily noise dose in percentage if an employee is exposed to following noise levels during a workshift?
 - i) 80 dB for 2 Hours
 - ii) 100 dB for 2 Hours
 - iii) 95 dB for 3 Hours
 - iv) 105 dB for One Hour
2. Benzene is a relatively unique volatile organic in that it has three publishable exposure limits - its PEL-TWA = 1.0 ppm (vol), its PEL-STEL = 5.0 ppm (vol) and its PEL-C = 25.0 ppm (vol). Express these concentrations in mg/m³, assuming STP conditions. Benzene's Molecular Weight is 78.11.
3. What is local exhaust ventilation system? Describe in details about various components of this system.
4. Write short notes on:
 - a) Biological hazardous agents?
 - b) Notations in the ACGIM-TLV list.
5. Describe various states of matter (eg. dust, Fumes, vapour etc) the presence of which may be hazardous in work atmosphere?

OR

What are the hazards of asbestos? Describe the method of sampling and analysis of asbestos in work place.

6. Write short notes on:

a) TLV - TWA	b) STEL
c) Notation A1 - A5	d) BEI
7. Find out TLV of air mixture having concentration of 20 PPM of Ammonia (TLV 25 PPM) and 40 PPM of carbon monoxide (TVV-25 PPM).
8. Write short notes on:
 - a) Lead poisoning
 - b) Occupational disease of skin
 - c) Asbestos monitoring
