Roll No

IT-7005(1)-CBGS

B.E. VII Semester

Examination, June 2020

Choice Based Grading System (CBGS)

Ad-hoc Networks

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) What do you mean by Ad Hoc network? Differentiate between the cellular network and Ad Hoc Network.
b) Explain various design issues and challenges in Ad Hoc networks.
2. a) What do you mean by Heterogeneity in Mobile devices? Discuss the various characteristics of wireless channel.
b) Explain the role of mobility models in Ad Hoc Networks. Show different types of mobile host movements.
3. a) Classify MAC protocol for Ad Hoc Networks and present an overview of the same.
b) Discuss contention based protocols with scheduling mechanism.
4. a) Discuss the design issues and goals of MAC protocols.
b) What is the need for Routing protocols? Discuss the design issues in routing protocol.

IT-7005(1)-CBGS

PTO

[2]

5.
 - a) Differentiate between proactive, reactive and hybrid routing. Discuss various protocols used in multicast routing protocols.
 - b) Classify various transport layer protocols for Ad Hoc networks.
6.
 - a) Outline the issues related to the transport layer in wireless sensors.
 - b) List the major security threats that exist in Ad hoc wireless networks.
7.
 - a) Why Energy management is essential in MANET? Give a classification of Energy management techniques.
 - b) What are the issues and challenges are there in providing security provisions to Ad hoc networks?
8. Write short notes on any two of the followings
 - a) GSM
 - b) GPRS
 - c) WSN
 - d) Zone routing protocol
