

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

IT-703(B)-CBGS

B.Tech., VII Semester

Examination, December 2020

Choice Based Grading System (CBGS)

Internet of Things

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) Describe IoT reference architecture and information model.
b) Discuss IoT levels and deployment templates. Illustrate the significance of each level.
2. a) How might Internet address (IPv6) affect the development and implementation of the IoT?
b) What are the differences between machines in MQM and things in IoT?
3. a) Give a suitable classification of sensors used in IoT.
b) With the help of suitable examples explain Hysteresis and quantization errors.
4. Write short notes:
 - i) Sensor Resolution
 - ii) Soft actuators

IT-703(B)-CBGS

PTO

[2]

5.
 - a) What is IEEE 802.15.4 protocol? How is it related to IoT?
 - b) Explain principles of RFID. How are RFID and internet of things linked?

6.
 - a) What is ZigBee? Explain it with its types.
 - b) Discuss the concept of Near Field Communication. Define Bluetooth technology.

7.
 - a) Differentiate between AMQP and MQTT. Does MQTT use Web Sockets.
 - b) Explain CoAP. How it can be used between devices on the same constrained network.

8. Write short notes on any two of the following:
 - i) Raspberry Pi
 - ii) Arduino
 - iii) Cloud for IoT
