

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

IT-720 (GS)
B.E. VII Semester Examination, June 2020
Grading System (GS)
Embedded System
Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.
ii) All questions carry equal marks.

1. Explain how cross-compiler and cross assembler's are used for host and target machines.
2. Explain about the architecture of microprocessor-based embedded system and microcontroller-based embedded system with neat diagram.
3. Define:
 - a) ALU
 - b) Flag
 - c) ACCUMULATOR
 - d) SP
 - e) PC
 - f) IR
 - g) HL pair register
4. Explain the different program layers in the embedded software and also the process of converting a "C" program into the file for ROM image with suitable block diagrams.
5.
 - a) Define addressing mode of 8085 microprocessor. Each with suitable example.
 - b) Explain CALL instruction.
6. Write short notes on
 - i) Task synchronization
 - ii) Multi processing and multi task
7.
 - a) Define embedded system with suitable block diagram.
 - b) Explain STACK operation of 8085 μ p.
8. Define following in brief:(Any four)
 - a) DFG
 - b) UML
 - c) Sequential programmed model
 - d) Concurrent model
 - e) CFG
 - f) SMM
 - g) Hardware/Software co-design.
