

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

IT-722 (GS)

B.E. VII Semester Examination, June 2020

Grading System (GS)

High Performance Computing

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. Discuss the architecture of high performance computing.

OR

Discuss programming models in high performance computing.

2. Describe the following term

a) Open MP

b) Programming paradigms and distributed memory processing.

3. Explain the Architectural configuration of parallel processing systems with block diagram.

4. a) Explain about caching.

b) Explain briefly:

i) Load balancing

ii) Sequential computing

5. Write short note on:

i) PVM

ii) UPC

iii) Petaflop programming

6. a) Explain the uses of temporal and spatial locality models.

b) Describe about computational grid with example.

7. Discuss the various issues to be faced in Cluster design.

8. Write a short notes (any two)

a) Loop invariants

b) Super scalar processors

c) Grid security infrastructure

d) Vector processing
