

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

IT-832 (GS)
B.E. VIII Semester Examination, June 2020
Grading System (GS)
Image Processing
(Elective - III)
Time : Three Hours

Maximum Marks : 70

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.

1. What are the structuring element used in Morphological Processing? Give three structuring elements that are symmetric.

OR

Show how the hit or miss transformation operation is carried out by taking an example.

2. a) Define sampling and quantization. Differentiate scalar and vector quantisers.
b) Explain the thresholding. Write algorithm to compute basic global threshold value.
3. What is meant by Image enhancement by Point Processing? Discuss about gray level slicing.
4. Write short notes on :
a) Erosion
b) Chain codes
c) Run length coding
d) Image Morphology
5. What is Digital Image? What are the basic components of Digital Image? Mathematically differentiate binary, grayscale and color images.
6. What is Half toning techniques? What is the basic concept for implementing half toned to gray scale image?
7. Differentiate between lossless and lossy compression and explain transform coding system with a neat diagram.

OR

Explain the process of Polygonal Approximations using Minimum Perimeter Polygons.

8. Write short notes (any two) :
a) Image Skeleton
b) Median Filtering
c) Hadamard transform
