ME-7005(2)-CBGS

B.E. VII Semester

Examination, June 2020

Choice Based Grading System (CBGS)

Power Technology

Time : Three Hours

Maximum Marks : 70

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.

1. a) What is nuclear fusion? How does it differ from nuclear fission?
b) Discuss some of the safety measures for the nuclear power plant.
2. Give an account of various types of solar collectors and explain how this energy is made to operate an electricity generation plant. What are the limitations in harnessing the solar energy?
3. a) Explain the component of the wind mill and how does it operates to move the turbines.
b) What is wind rose? Write silent features of wind rose.
4. a) What is meant by anaerobic digestion? What are the factors that influence this process?
b) Write a brief note on energy plantation.
5. a) Write two methods of preparation of hydrogen on industrial scale. Discuss various methods of storage of hydrogen.

ME-7005(2)-CBGS

PTO

[2]

- b) Explain the principle of electricity generation using hydrogen.
- 6. a) What do you mean by economics of nuclear power plants?
b) Describe briefly the methods of storage of solar energy (thermal) for subsequent conversions.
- 7. a) Discuss the potential of installing wind power station in Indian states.
b) Give a sketch of a gohar gas production plant and explain its functioning.
- 8. Write a short note on the following.
 - a) Passive heating system
 - b) Biomass classification
 - c) Fuel cell efficiencies
