

Roll No

ME-804 (GS)
B.E. VIII Semester
Examination, May 2019
Grading System (GS)
CAD/CAM/CIM
Time : Three Hours

Maximum Marks : 70

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.

1. a)* What are the various activities of a manufacturing plant? Which can be carried out through computer control?
b) Discuss the main elements of CIM systems.
2. a) Briefly discuss the different techniques used for scan conversion in computer graphics.
b) What is the need of data standardization? Explain the different drawing data exchange formats.
3. a) What are the advantages of parametric modelling in designing curves and surfaces?
b) Compares the splines for the same path created by B-splines and Bezier spline techniques.
4. a) Explain the principles of NC machines? How productivity can be increased using NC machines.
b) What do you understand by the term G codes? Explain with suitable examples.

5. a) Explain the importance of group technology in global competitive environment.
b) What is FMS? How flexibility can be achieved?
6. a) Explain the various stages of product life cycle with the importance of each stage.
b) Explain the following commands in graphic modelling.
 - i) Scaling
 - ii) Mirror
 - iii) Rotation
7. a) What is rapid prototyping? Explain in brief.
b) Explain in brief the computer aided process planning.
8. Write a short note of the following.
 - a) Agile manufacturing
 - b) World coordinate system
 - c) Wire frame modelling
