B.E. VI Semester

Examination, June 2020

Choice Based Grading System (CBGS)

Mining Machinery - II

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) Describe the construction and working of belt conveyor.
b) Calculate the carrying capacity for coal of a 900mm belt conveyor when the cross-section area of load is of 0.0746m^2 and the belt moves at a speed of 125 m/min.
2. a) Compare drum winding and friction winding.
b) Explain Cage suspension gear.
3. Explain various types of valves used on a hydraulic circuit.
4. Explain the torque time and power time diagram of a Koepe Winder.
5. Explain the conditions of applicability advantages and disadvantages of aerial rope ways.
6. a) What are the various types of Ropeway used in Mining Areas? Explain in brief w.r.t. travelling mechanism of buckets.

MI-6003-CBGS

PTO

[2]

- b) With a schematic diagram. Describe w.r.t. Its Rope tensioning arrangements.

7. Discuss:

- a) Multi-rope winding
- b) Pit bottom arrangement of skip

8. Write short note on any two:

- i) Accumulators and its different types
- ii) Different types of valve
- iii) Hydraulic motor
