

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

MI-702 (GS)
B.E. VII Semester Examination, June 2020
Grading System (GS)
Strata Control
Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.
ii) All questions carry equal marks.

1. Explain the redistribution of pressure by Pressure Arch Theory with example of longwall workings.
2. Write the difference between hydraulic prop and friction prop.
3. What do you mean by convergence? Discuss various factors affecting the convergence and suggest remedial measures to control it. Describe the methods to measure convergence.
4. Give a layout of a stowing face and give arrangements at face and working of sand stowing.
5. What are the advantages of stowing? Describe the process of mechanical and pneumatic stowing with its advantages and disadvantages.
6. As per coal mine regulation give the provision of systematic support rule.
7. Explain with neat sketch.
 - i) Sub critical subsidence
 - ii) Super critical subsidence
 - iii) Positive and negative subsidence
 - iv) Angle of draw.
8. Write a note on (any five)
 - i) Roof bolting
 - ii) Subsidence factor
 - iii) Point of Inflexion
 - iv) Pipe jam in hydraulic stowing
 - v) Rate of stowing
 - vi) Pot holes
