

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

MI-8002 (CBGS)
B.E. VIII Semester Examination, June 2020
Choice Based Grading System (CBGS)
Computer Application in Mining
Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions out of eight.
ii) All questions carry equal marks.

1. a) Discuss the various peripherals of computer and its applications. 7
b) Explain about the basic features of a flowchart. 7
2. Write a program with a flow chart to design a ventilation system for a coal mine. Assume your own conditions. 14
3. Describe the flow chart of ore reserve calculation of a surface mine. Assume your own conditions. 14
4. Explain about the Numerical Modelling of a Subsidence model of mechanized Longwall operations. 14
5. Write a flow chart for laying a belt conveyor in a mechanized underground mine. 14
6. a) Explain the algorithm for Shovel-Dumper combination equipment selection in an iron ore mine. 10
b) Briefly discuss the advantages of using the DBMS. 4
7. a) Explain the algorithm for blast design. 10
b) Write about applications of Robotics in Mining 4
8. a) Explain about the simulation of Machine Repair Problem. 7
b) Applications and limitations of remote control operations in mining. 7
