B.E. VI Semester Examination, June 2020

Grading System (GS)

Textile Testing - II

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. Calculate the actual c.v% of a 30^S Ne cotton yarn made with 2 dtex cotton fibre and with 1.2 index of irregularity of the spinning process.
2. If the cotton sample shows the bending length of 2 inch, find out its flexural rigidity in mg cm and bending modulus in log/cm².
3. a) Explain pendulum lever principle with constant rate of traverse.
b) Explain working of uster evenness tester with neat sketch.
4. Explain CRE, CRL and CRT principle of tensile testing with neat sketch.
5. Explain crock meter? How color fastness of fabric can be assess with this instrument?
6. Explain working of Elmendorf tearing test tester.

OR

Describe pilling test with ICL pill box.

7. What is KAWABATA fabric evaluation system explain in detail?

OR

Discuss various factors affecting flammability of fabric?

8. a) Explain in detail length-variance curve.
b) Explain various causes of irregularity in yarn.
