TX-7001-CBGS

B.E. VII Semester

Examination, December 2020

Choice Based Grading System (CBGS)

Advance Yarn Manufacturing

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) Describe the basic limitation of Ring spinning system.
b) State the various method of manufacturing of advance yarn.
2. Draw a neat sketch of rotor spinning process with the levelling of each component and stages.
3. a) State the various properties of rotor yarn with explanation.
b) What is wrapper fibre? How these are formed in the rotor yarn? Explain the factors responsible for such formation.
4. a) Explain the principle of air-jet spinning. How air-jet yarn is spun with double nozzles?
b) Compare properties of air-jet yarn with ring spun yarn.
5. a) What is friction spinning? How Dref-3 yarn can be manufactured?
b) Compare the Dref-2 and Dref-3 spinning.

TX-7001-CBGS

PTO

[2]

6.
 - a) Describe the wrap spinning process with a neat sketch.
 - b) What is adhesive spinning? Describe the Bobtex spinning process.

7.
 - a) Explain the structure of air-jet spun yarn with respect to orientation of fibre, migration of fibre and packing factor.
 - b) Explain the manufacturing process of wrap yarn or Hollow spun yarn with a neat sketch.

8. Write short notes on.
 - a) Electro-static spinning
 - b) Bobtex spinning
 - c) Air vortex spinning
 - d) Disc spinning
