

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

TX-7003-CBGS

B.E. VII Semester

Examination, December 2020

Choice Based Grading System (CBGS)

Textile Chemistry -II

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) Distinguish between dyeing and printing.
b) Write down various ingredients used in printing cotton fabric using reactive dye and mention their functions.
2. a) Discuss various styles of printing.
b) Describe roller printing method with neat sketch.
3. a) Describe tie and dye and Batik printing alongwith their significance.
b) Describe transfer printing with neat diagram.
4. a) Discuss the significance of using non-formaldehyde based crease resistant finishes.
b) Discuss various factors affecting designing of padding mangle.
5. a) Compare and contrast temporary, semi- permanent and permanent finishes.
b) Describe various types of padding mangle.

[2]

6.
 - a) Discuss swizzing, chasing, friction and schreinerer calendars.
 - b) Discuss various factors affecting wet pick up.
7.
 - a) Discuss various stages of development of easy care finish.
 - b) Viscose fabric is to be resin finished with DMDHEU by pad-dry-cure technique. Assume that mass of the fabric per unit area is 200gm/m^2 , width of the fabric is 100cm, speed of the machine is 50m/min., Concentration of pad liquor is 100g/l, wet pick up is 100% and specific gravity of padding liquor is 1.0. Calculate the resin add-on after padding in kg per kg of fabric.
8.
 - a) Discuss after treatment of printed fabrics.
 - b) Define pigment. Write down the advantages of pigment printing mention the properties of binder.
