

Total No. of Questions : 8]

[Total No. of Printed Pages : 2

Roll No

TX-704-GS
B.E. VII Semester
Examination, December 2020
Grading System (GS)
Advance Yarn Manufacturing

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. a) Discuss the various parameters of Rotor and its effect.
b) Why the strength of rotor yarn is less than ring yarn?
2. a) Explain the structure of Rotor yarn.
b) Differentiate the structure of Dref-2 yarn and Dref-3 yarn.
3. Explain with neat diagram the material passage through Rotor Spinning Machine.
4. a) What is Air-jet yarn? How Air-jet yarn is produced by using the false twist spinning?
b) What is wrap spinning?
5. a) Explain the principle of air-Jet spinning.
b) Draw the path of material in air-Jet (Murata) spinning machine.

TX-704-GS

PTO

[2]

6. A 100 Tex Yarn is being spun on an friction spinning machine with drum dia of 200 mm. The TPM measured is found to be 1000 after twist loss of 30%. If the drum speed is 1000 rpm. Calculate the yarn delivery rate in mpm.
7. Distinguish between.
 - a) Air-Jet spinning and Air-vortex spinning.
 - b) Dref-2 and Dref-3 spinning.
 - c) Parafil and plyfil yarn
 - d) Bobtex and Twilo yarn.
8. Write short notes on:
 - a) Electrostatic spinning
 - b) Parafil yarn
 - c) Air-vortex spinning
 - d) Disc spinning
