

Total No. of Questions : 8]

[Total No. of Printed Pages : 1

Roll No

TX-704 (GS)

B.E. VII Semester Examination, June 2020

Grading System (GS)

Advance Yarn Manufacturing

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.

ii) All questions carry equal marks.

1. How the technical limitations of ring spinning is being overcome through modern development in ring frame?
2. Describe in details, the requirement of raw material in rotor spinning.
3. Explain the working of a Dref-3 friction spinning machine to produce a friction spun yarn.
4. Why the stiffness of air-jet yarn is very high?
5. What is wrap spinning?
6. Distinguish between.
 - a) Dref-2 and Dref-3 spinning.
 - b) Parafil and plyfil yarn
 - c) Bobtex and Twilo yarn.
7. Why rotor spinning is suitable for coarser count? What is the effect of fibre length, fibre fineness and trash level in rotor spinning?
8. Answer any two of the following:
 - a) Compare the properties of Ring Yarn and Rotor Yarn.
 - b) Explain in brief the structure and aspect of rotor and its influence on yarn.
 - c) Compare Rotor yarn and Air-jet yarn.
 - d) Write the end uses of friction spun yarn.
