Total No. of Questions : 8] *[Total No. of Printed Pages : 1*

Roll No

FT-802 (GS)

B.E. VIII Semester Examination, June 2020

Grading System (GS)

Fire Fighting Installation and Automation

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.
ii) All questions carry equal marks.

1. Explain the difference between Sprinkler system and Installation? What are the use and limitation of Dry pipe system over wet pipe system Installation?

2. Determine the pump capacity, delivery pressure and number of hydrants of the basis of nature of risk.

 OR

 Define fire load and its importance in hazards classification to achieve design objectives of fire fighting.

3. Define High Velocity Water Spray Projection System and Medium Velocity Water Spray Project ion System?

4. Write short note on following water storage tank equipment and accessories?
 i) Valve pit ii) Cathodic Protection

5. Write the short notes on:
 i) Deluge valve ii) Solenoid valve
 iii) Drenchers system iv) Pressure relief valve

6. What are the different ceiling height and fire detectors spacing criteria as per IS-2189?

 OR

 Write a short note on foam concentrates and their classification.

7 Discuss sprinkler system for individual degree of hazard on the following point.
 i) Pressure and flow requirement ii) Design density
 iii) Rules for spacing sprinkler heads iv) Piping size and range pipes

8. Answer any four of the following:
 a) What is rising main? Write its type.
 b) Explain inspection and testing care of hydrants.
 c) Define Pre-Mixed Foam Installation?
 d) Explain the essential components of carbon dioxide extinguishing system.
 e) What is a zone and what are its criteria?
 f) Explain what factors need to be considered when selecting an alarm system.
