Total No. of Questions : 8] *[Total No. of Printed Pages : 1*

Roll No

IT-710 (GS)

B.E. VII Semester Examination, June 2020

Grading System (GS)

Advanced Concepts in Database Systems

Time : Three Hours

Maximum Marks : 70

Note: i) Attempt any five questions.
ii) All questions carry equal marks.

1. Give any two advantages of DBMS approach on traditional file system approach.
2. Discuss the steps involved in query processing with a neat diagram.
3. What are the benefits of enforcing the integrity constraints as part of database design and implementation process (instead of doing it in application design)?
4. Discuss how parallelism could be used in query processing and relational operation executions.
5. Define:
 i) DBMS Benchmarks
 ii) Query Processing Cost.
6. Discuss the different concepts for implementing each of the following relational operators.
 i) JOIN ii) PROJECT
 iii) UNION iv) INTERSECTION
7. a) Write short note on:
 i) Concurrency
 ii) Recovery
 b) Explain briefly about Fragmentation with suitable examples.

 OR

 Write notes on:
 a) Deductive databases
 b) Distributed databases
8. Answer any two of the following:
 a) Write difference between specialization and generalization.
 b) Explain system catalogue in RDBMS.
 c) What do you mean by deadlock detection and resolution.
 d) Write different issues in real time data base design.
